~~JAMES McEVOY.~~ WM. J. WATSON.

NOVELTY VARNISH WORKS.

~~JAS. McEVOY & CO. Proprietors.~~

~~Office and Store Room, 128 North Fourth St., Philada.~~

Factory, N. W. Corner of Sixth and Reed Streets,

PHILADELPHIA.

The attention of the trade is respectfully invited to

OUR MANUFACTURES,

embracing the several varieties usually connected WITH THE VARNISH BUSINESS. Also some

SPECIALTIES

EXCLUSIVELY OUR OWN.

which are manufactured under our immediate supervision, with skill and knowledge acquired during many years of PRACTICAL EXPERIENCE, enabling us to offer goods UNSURPASSED either of American or European Manufacture.

OUR VARNISHES ARE REMARKABLE

FOR THEIR

Brilliancy, Uniformity & Durability;

combining FULLNESS, ELASTICITY and PALENESS, and are PERFECT in their DRYING and HARDENING properties. They will, in all cases, be

☞ **Guaranteed to be as represented.**

The patronage of close, careful and responsible buyers is earnestly solicited.

WALNUT STAIN VARNISH

This very desirable article is manufactured by us only. To light colored wood it imparts the color of Western Walnut. It is desirable on Pine, Oak, Chestnut, or Cherry Woods, giving them

The Appearance of Bright Western Walnut.

In repairing old furniture it will be found indispensible, as it

STAINS AND VARNISHES AT ONCE.

The brilliancy is equal to the best flowing varnish, and quite as lasting; dries quick and hard, works free, is made of superior articles.

☞ **Guaranteed to wear.**

We also manufacture an article known as the

Novelty Filling Shellac.

This article is transparent, and answers all the purposes that the ordinary Shellac is adapted to; dries quickly, flows freely, rubs and wears similar to pure Shellac. To

WALNUT FURNITURE MANUFACTURERS,

this Novelty Filling Shellac will be found equally as desirable as any that can be had, and the price. **$1.75,** should induce those using this class of goods to GIVE IT A FAIR TRIAL.

OXIDE LIQUID DRYER.

Our OXIDE LIQUID DRYER is a specialty EXCLUSIVELY OUR OWN. We claim for this article a

DECIDED IMPROVEMENT

over the old method of muddy dryers that discolor paint. It dries paint quickly, mixes without curdling, has a moderately heavy body, is equally adapted to the wants of the Carriage Painter as well as House Painter. The color being so light is one great advantage we claim, and

In Damp Weather it Dries Paint as quickly as in Clear.

This article is held in general favor wherever used. The increasing demand warrants us in saying that our Oxide Liquid Dryer will supersede all others.

A Trial is all we ask. We guarantee it as represented. Samples forwarded free of charge.

M'EVOY'S CORAL FILLING

A SPECIALTY.

MANUFACTURED AT OUR WORKS.

As a standard preparation adapted to the wants of

Carriage Makers and Car Builders,

superior to the English rough stuff, filling completely and permanently the pores of the wood; surpassing in adhesiveness any other composition, imparting to the surface

A TOUGH AND ELASTIC FOUNDATION,

rubs easy, does not fill the pores of pumice stone, dries quickly. It will be found a very desirable filling on running gears, as it rubs with sand paper and fills the grain of the wood without the aid of putty, &c.

A Trial will Convince the most Doubting

that the Coral Filling is indispensible where perfection and durability is desired. It is also particularly adapted to repairing CRACKED, ROUGH and MUTILATED COACHES, CAR or HOUSE WORK. *The Coral Filling flows into defects, and when rubbed down with pumice stone or sand paper, becomes as solid and smooth as marble; it will be found impossible to detach it from the crevices without taking the wood itself.* Coral Filling is applied the same as a coating of paint.

Prepared in One, Two and Five Gallon Cans, ready for use, with Full directions accompanying each Can,
